

BANGLADESH

General obligations and scope of application

Article One (1)

Our aim is to have a comprehensive and effective Convention with universal applicability. We are comfortable with present Article 1, particularly sub para a & b. We believe transition provisions is not necessary in Article 1, as these are covered in Article 4. As we are also participants of UNPKO we appreciate the consensus expressed by some countries regarding inter-operability. We must find practical ways and means to deal with this issue. In this regard we fully support the statement made by Norway.

We also think like CMC that the general obligations should also include the “*positives*”.
