

Management Response: MFAT Support To Pacific Justice Sector 2010 - 2020

Recommendation	Response and Action (Agree, Partially Agree, Reject)
MFAT should develop a justice sector strategy and M&E framework to support evidence-based learning, management and reporting	Agree. This idea has been socialised and noted. We plan to work with stakeholders on this during 2021/22.
The strategy should explore opportunities to expand the scope of support to the non- formal justice sector in the Pacific, in particular focusing on innovation and activities that are demonstrating results	Agree. Opportunities to expand the scope of support are being explored as part of the planning for the new regional programme that is currently under way.
The strategy should build on the good relationships that have been established with the formal justice system in the Pacific to reach out to the non-formal justice sector	Agree. Noted. We envisage this happening under the new regional programme.
The strategy should continue to support activities that improve court performance and access to the courts, but this needs to be balanced with more holistic support	Agree. Noted and being explored in planning currently under way.
The strategy should prioritise funding in both formal and non-formal justice sector support, depending on the strengths, opportunities and needs of different PICs	Agree. Noted and being explored in planning currently under way.
