Activity Number ACT-0100364

Activity Name: Comprehensive Tokelau Coastal Risk Study and Risk Mitigation Plan

Objective:

The objective of this activity is to contribute to the goal of enhanced coastal resilience of Tokelau against existing and future erosion and inundation, including those arising from climate change. This Activity will enhance resilience to coastal hazards on Tokelaus atolls through producing a Coastal Hazard Study; Coastal Risk Mitigation Plan and long term data collection on changes in ocean level and wave action.
