

Metadata for Dec-2019 IATI Open Data Release

These files contain data relating to all NZ Aid funded activities as at 12th December 2019 that:

1. were in the design, implementation, closing or closed stage.
2. had financial values greater than zero between the period 01 Jul 2012 and 30 June 2022.
3. did not meet MFAT's exclusion criteria (these are activities with specific concerns relating to security/safety, privacy, sensitive/confidential information, or harm to operations).

The following decisions or exceptions have been applied to the data in this release:

1. For activities with no implementation date, the first financial transaction date is used.
2. 540 closed activities have a closed date which is the date the activity was migrated into the new aid management system. In these instances, the last financial transaction date has been provided as a more reliable proxy.
3. Narration of financial transactions for actual expenditure has standard text of "expenditure incurred in financial year" whereas committed financial transactions state "expenditure committed in financial year". This is a temporary measure while privacy concerns are resolved.
4. The Primary ID has been updated with the current Aid Management System ID. The previously released Primary ID has been moved to the "Other ID" field for reference.

	Attribute	Description
1	External ID	The activity unique ID
2	Activity Full Name	The long name of the activity
3	Activity Description	A short description outlining what the activity is and what it will achieve. It must be at least 80 characters and contain no personal or sensitive information.
4	Classification	Classification describes the type of aid: - Budget support; - Core contributions and pooled programmes and funds ; - Project-type interventions; - Scholarships and student costs in donor countries; - Debt relief; - Administrative costs not included elsewhere; - Other in-donor expenditures;
5	Tying	Tying describes the extent to which funding is limited (tied) to procurement of NZ goods and services, or if procurement can be sourced from any country. Select the appropriate indicator: - Tied – funding is restricted to procurement from NZ - Partially Tied - funding is restricted to procurement from a select group of countries (i.e. some developing countries are excluded) - Untied – there are no nationally based restrictions on procurement - Excluded – the Activity does not meet the criteria for ODA (i.e. excluded from DAC reporting)
6	Current Stage	Provides the current stage of the activity (design, implementation, closing, closed)
7	Implementing Partners	MFAT is temporarily withholding this field while we ensure privacy and confidentiality obligations are met.
8	Countries / Region	The country, countries and/ or region where the activity occurs.

9	CRS Purpose Code (Sector)	The CRS level 3 purpose codes(s) relevant to the activity and percentage contribution of the activity, e.g.: (32310 - Construction policy and administrative management - 80.00% 33210 - Tourism policy and administrative management - 20.00%)
10	Gender Equality	<p>These fields are OECD Development Assistance Committee (DAC) Markers and identify if the activity contributes to the relevant area, such as gender equality or climate change. The options to display under each marker are as follows:</p> <p>-Principal – one of the main outcomes of the Activity, is specifically and explicitly captured in Activity documentation including Results</p> <p>-Significant – an outcome of the Activity that is captured in Activity documentation</p> <p>-Not Targeted – has been assessed and found not to be an outcome of the Activity</p> <p>-Blank – leave blank if the marker is ‘Not Measured’, i.e. the Activity has not yet been considered and assessed against this policy objective.</p>
11	Environment	
12	Good Governance (Participatory Development)	
13	Trade Development	
14	Environment - Biodiversity	
15	Environment - Climate Change Mitigation	
16	Environment - Climate Change Adaption	
17	Environment - Desertification	
18	Disaster Risk Reduction	
19	Disability	
20	Reproductive, Maternal, New-born, and Child Health	
21	Estimated Implementation	The date the activity was estimated to enter implementation (Where there is no estimated implementation date for historic activities, use actual implementation date, or first transaction date)
22	Actual_Start	The date the activity actually entered implementation (For historic activities, if there was no implementation date, the first transaction date has been used)
23	Estimated_Closed	The date the activity was estimated to close. (For historic activities where there was no estimated close date, the actual close date has been used)
24	Actual_End	The date the activity was actually closed. (For historic activities where there was no close date, the date the last transaction was processed has been used)
25	Actual transaction - supplier type	The type of supplier the transaction relates to from: Government Local Government Other Public Sector International NGO National NGO Regional NGO Partner Country based NGO Public Private Partnership Multilateral Foundation Private Sector Private Sector in Provider Country Private Sector in Aid Recipient Country Private Sector in Third Country Academic, Training and Research Other

26	Actual transaction - value	The total value of the financial transaction in \$NZD
27	Committed transaction - date of transaction	The date the payment is expected to be made, expressed as a milestone in the Aid Management System
28	Committed transaction - supplier type	The planned type of supplier the transaction relates to from: Government Local Government Other Public Sector International NGO National NGO Regional NGO Partner Country based NGO Public Private Partnership Multilateral Foundation Private Sector Private Sector in Provider Country Private Sector in Aid Recipient Country Private Sector in Third Country Academic, Training and Research Other
29	Committed transaction - value	The total value of the milestone in \$NZD
30	Last Updated	The date the activity was last modified in the Aid Management System
