Metadata for IATI open data release

These files contain data relating to all NZ Aid funded activities as at date of last publication that:

1. were in the design, implementation, closing or closed stage.
2. had financial values greater than zero between the period 01 Jul 2012 and 30 June 2028.
3. did not meet MFAT's exclusion criteria (these are activities with specific concerns relating to security/safety, privacy, sensitive/confidential information, or harm to operations).

The following decisions or exceptions have been applied to the data in this release:

1. For activities with no implementation date, the first financial transaction date is used.
2. 540 closed activities have a closed date which is the date the activity was migrated into the new aid management system. In these instances, the last financial transaction date has been provided as a more reliable proxy.
3. Narration of financial transactions for actual expenditure has standard text of "expenditure incurred in financial year" whereas committed financial transactions state "expenditure committed in financial year". This is a temporary measure while privacy concerns are resolved.
4. The Primary ID has been updated with the current Aid Management System ID. The previously released Primary ID has been moved to the "Other ID" field for reference.

	Attribute	Description
1	External ID	The activity unique ID.
2	Activity Full Name	The long name of the activity.
3	Activity Description	A short description outlining what the activity is and what it will achieve. It must be at least 80 characters and contain no personal or sensitive information.
4	Activity Objective	A short narrative outlining the purpose of the activity.
5	Activity Results	A qualitative or quantitative assessment of activity performance.
6	Classification	Classification describes the type of aid from: Budget support Core contributions and pooled programmes and funds Project-type interventions Scholarships and student costs in donor countries Debt relief Administrative costs not included elsewhere Other in-donor expenditures
7	Tied Status	Tying describes the extent to which funding is limited (tied) to procurement of New Zealand goods and services, or if procurement can be sourced from any country. Select the appropriate indicator: Tied: funding is restricted to procurement from NZ

		Partially Tied: funding is restricted to procurement from a select group of countries (i.e. some developing countries are excluded) Untied: there are no nationally based restrictions on procurement Excluded: the activity does not meet the criteria for ODA (i.e. excluded from DAC reporting)
8	Current Stage	Provides the current stage of the activity (design, implementation, closing, closed).
9	Implementing Partners	The implementing partner(s) identified. This field is limited to partners identified in as an "Organisation".
10	Countries / Region	The country, countries and/ or region where the activity occurs.
11	CRS Purpose Code (Sector)	The CRS level 3 purpose codes(s) relevant to the activity and percentage contribution of the activity, e.g.: (32310 – Construction policy and administrative management - 80.00% 33210 – Tourism policy and administrative management - 20.00%).
12	Gender Equality	These fields are OECD Development Assistance Committee (DAC) Markers and identify if the activity contributes to the relevant area, such as gender equality or climate change. The options to display under each marker are as follows: Principal: the objective is the primary reason for undertaking the activity. Significant: the objective is one of the reasons for undertaking the activity. Not Targeted: the activity has been assessed and found not to be an objective of the activity. Blank: the field is blank if the activity has not yet been considered and assessed against the objective.
13	Environment	
14	Good Governance (Participatory Development)	
15	Trade Development	
16	Environment – Biodiversity	
17	Environment – Climate Change Mitigation	
18	Environment – Climate Change Adaptation	
19	Environment – Desertification	
20	Disaster Risk Reduction	
21	Disability	
22	Reproductive, Maternal, Newborn, and Child Health	
23	Estimated Implementation	The date the activity was estimated to enter implementation. (Where there is no estimated implementation date for historic activities, use actual implementation date, or first transaction date).
24	Actual Start	The date the activity actually entered implementation. (For historic activities, if there was no implementation date, the first transaction date has been used).
25	Estimated Closed	The date the activity was estimated to close. (For historic activities where there was no estimated close date, the actual close date has been used).
26	Actual End	The date the activity was actually closed. (For historic activities where there was no close date, the date the last transaction was processed has been used).
27	Capital Spend	Percentage value of activity considered "capital".
28	Location	Geographic co-ordinates (longitude and latitude)
29	Actual transaction – supplier type	The type of supplier the transaction relates to from: Government Local Government Other Public Sector International NGO National NGO Regional NGO Partner Country based NGO Public Private Partnership Multilateral Foundation

		Private Sector Private Sector in Provider Country Private Sector in Aid Recipient Country Private Sector in Third Country Academic, Training and Research Other
30	Actual financial transaction – value	The total value of the financial transaction in \$NZD.
31	Committed financial transaction – date of transaction	The date the payment is expected to be made, expressed as a milestone date in the Aid Management System.
32	Committed financial transaction – supplier type	The planned type of supplier the financial transaction relates to from: Government Local Government Other Public Sector International NGO National NGO Regional NGO Partner Country based NGO Public Private Partnership Multilateral Foundation Private Sector Private Sector in Provider Country Private Sector in Aid Recipient Country Private Sector in Third Country Academic, Training and Research Other
33	Committed financial transaction – value	The total value of the milestone in \$NZD.
34	Conditions	A 'Yes' or 'No' assessment of whether an activity has specific conditions attached, not general terms.
35	Pre project assessment	An assessment of the strategic and economic cases for the project.
36	Activity Evaluations	Link to the webpage where the activity evaluation is located.
37	Last Updated	The date the activity was last modified in the Aid Management System.
