

**JOINT DECLARATION ON COOPERATION
IN THE FIGHT AGAINST CLIMATE CHANGE**

BY

THE GOUVERNEMENT DU QUÉBEC

THE GOVERNMENT OF CALIFORNIA

AND

THE GOVERNMENT OF NEW ZEALAND

We, the Gouvernement du Québec, the Government of California and the Government of New Zealand hereby:

- *Recognize* the urgent need to reduce greenhouse gas emissions in accordance with the latest findings of the Intergovernmental Panel on Climate Change and the importance of adapting to climate impacts;
- *Affirm* our intention to support the full implementation of the Paris Agreement;
- *State* our common intent of transitioning toward net-zero-greenhouse gas emissions while creating new, quality jobs in low- or zero-emission sectors and facilitating a just transition for people impacted by the shift towards a carbon neutral economy;
- *Affirm* that cooperation between governments in a coherent and integrated manner facilitates the spread of best practices and encourages the development of innovative and effective solutions for reducing greenhouse gas emissions and adapting to the impacts of climate change;
- *Understand* the importance of carbon pricing and the reform and phase out of environmentally harmful subsidies, as efficient and critical tools for reducing greenhouse gas emissions at the scale necessary to limit the global average temperature increase to 1.5°C.

Therefore, we state our intention to:

- *Strengthen* our partnership in the fight against climate change by sharing information, experiences, and best practices on the implementation of our respective strategies, policies and programs in this area, including, inter alia, the design of cap-and-trade systems for greenhouse gas emissions, measurement, reporting and verification systems, sustainable mobility, forestry, agriculture, and aligning incentives and investments to support and bolster climate action.

- *Foster* research, development, deployment, and exchange of clean technologies including in renewable energy, energy efficiency, energy storage, agriculture, and zero-emission transportation;
- *Promote* environmental integrity of carbon pricing instruments to reduce greenhouse gas emissions worldwide; and
- *Explore* opportunities for potential future alignment of our respective cap-and-trade programs through focused information sharing and discussions related to cap setting, scope, auctions, allocation, market rules, and other key program design features.

This Joint Declaration is signed in six copies, in English, and French.

**FOR THE GOUVERNEMENT DU
QUÉBEC**

At _____, on _____

Benoit Charette
Minister of the Environment and the
Fight against Climate Change of Québec

**FOR THE GOVERNMENT OF
CALIFORNIA**

At _____, on _____
