cases are now closed

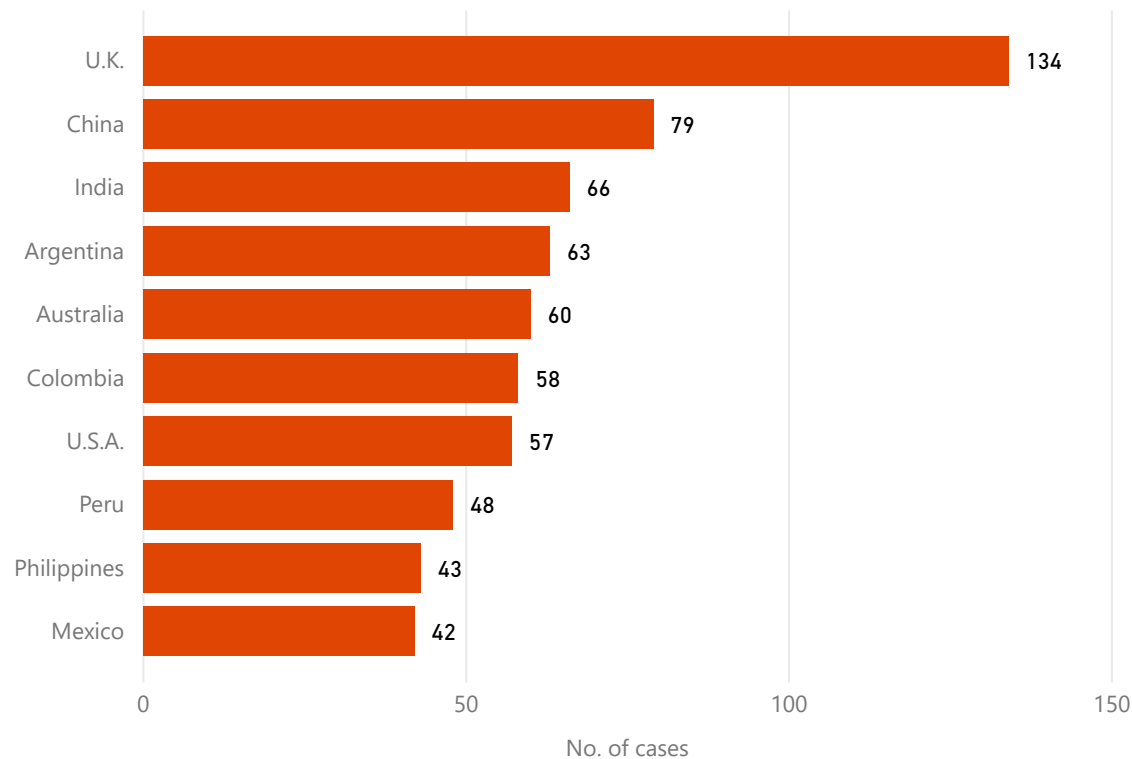

**1,805**

people have received consular assistance

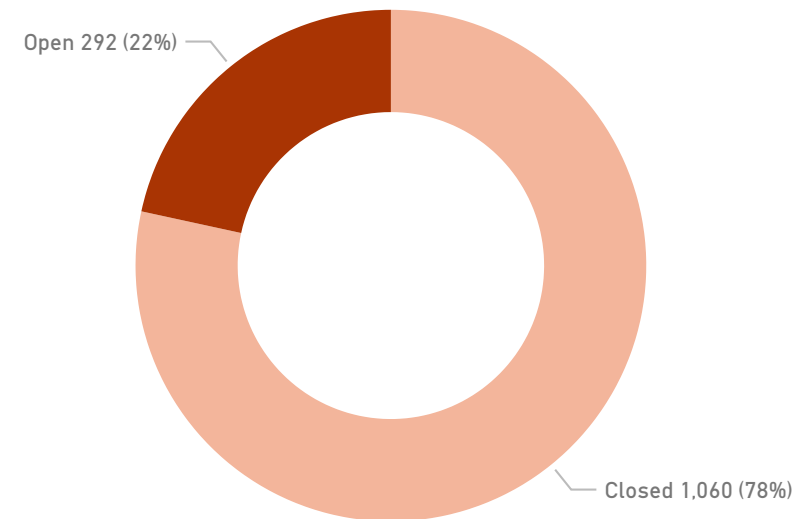

**127**

countries/territories

Countries/territories where we assisted with the highest number of consular cases

Current status of consular cases

## About

Consular assistance is available to New Zealanders travelling or residing overseas.

This dashboard shows open and closed consular cases related to the COVID-19 pandemic.

Our commitment to helping New Zealanders offshore has led to the largest consular response ever undertaken by MFAT. The consular assistance provided has helped New Zealanders to shelter in place or return home where possible.

The data is from the operational consular case management system: see the accompanying metadata files for more information.

We also release this data in a CSV file with the exact number of cases by country and case status.

The dashboard will be updated monthly.
