About

We encourage all New Zealanders travelling or living overseas to register their contact and travel details on SafeTravel.

Registering means we can send important information to you in an emergency situation.

This dashboard shows the number of active (currently overseas) SafeTravel registrations as at the date shown.

Registration on SafeTravel is voluntary, and the actual number of New Zealanders overseas will be higher.

We also release this data in a CSV file so you can view the exact number of registrations by country and reason for stay.

The dashboard will be updated monthly.
