Foreword from the Secretary of Foreign Affairs and Trade

This is the third Export Controls annual report by the Ministry of Foreign Affairs and Trade (MFAT). It covers the work of the Ministry, across the 2024 calendar year, in assessing and issuing permits for the export of strategic goods and the export and import of chemicals controlled by the Customs and Excise Act 2018 and the Chemical Weapons (Prohibition) Act 1996 respectively.

In June 2023, MFAT released its *Strategic Foreign Policy Assessment – Navigating a Shifting World*. This document outlined a more uncertain and complex international environment for New Zealand and explained that we need to navigate a wider array of global threats and increased risks.

New Zealand's export controls system continues to be an essential element of a multi-layered framework to prevent the unwanted proliferation of military and dual use technology. A strong export controls regime is essential to our national interests, facilitates trade, and helps to uphold our international commitments to prevent military and dual use technology being shared with malign actors.

2024 saw a considerable number of permit applications processed. As this is our third annual report, we have also been able to provide some trend analysis compared to the previous year. Of note, 2024 saw an overall 2.2% increase in permit applications. The regional focus of applications in 2024 was for Australia and the Pacific (44%), the Americas (14%), Asia (16%) and Europe (13%).

In recent years MFAT has strengthened its export control team and associated systems to uphold our obligations and interests as a responsible exporting country and to provide expert advice to exporters. Looking ahead to 2026, we are turning to strengthening New Zealand's export control legislation and ensuring it remains fit for purpose, in a changing and increasingly challenging strategic environment. Public consultation on options to strengthen our regime began in November.

A handwritten signature in black ink that reads "Beede Corry". The signature is fluid and cursive, with a small dot at the end.

BEDE CORRY

SECRETARY OF FOREIGN AFFAIRS AND TRADE
TE HEKERETARI O MANATŪ AORERE

The purpose of Export Controls

The purpose of New Zealand's Export Controls regime is to regulate the export of goods which may be intended for use that could, directly or indirectly, be to the detriment of New Zealand's security or national interests or contribute to human rights abuse or the contravention of international humanitarian law. These comprise strategic goods; and also, certain other goods intended for export to military and police end-users.

In achieving this purpose, the Export Controls regime fulfils New Zealand's domestic and international obligations, commitments and policies in relation to controlling the export of these goods, as well as giving effect to our commitment to being a responsible exporter of such goods.

What is controlled?

The export and import of all controlled chemicals, the export of strategic goods, and exports that are covered by catch-all provisions, are all prohibited under the Customs and Excise Act 2018, unless a permit has been obtained from the Secretary of Foreign Affairs and Trade.

Controlled chemicals:

Chemicals that could be used as weapons or weapons precursors, and chemicals related to other military purposes.

Strategic goods:

Goods listed on the New Zealand Strategic Goods List (NZSGL). These include firearms, military goods and technologies, organisms, dual-use goods and technologies, and goods and technologies that can be used in the production, development, or delivery of nuclear, chemical or biological weapons and their means of delivery.

Catch-all provisions:

Since 2020, all exports of goods and technology not listed on the NZSGL to any armed force, paramilitary force, police force or militia were brought under New Zealand's Export Controls regime. Some countries and goods are exempt from these catch-all provisions.

Overview of application processing

1,068 permit applications were processed in 2024. The majority of these applications related to the export of strategic goods and required completion of a standard assessment for approval.

34 required full assessments. A permit application undergoes a full assessment when the goods or technology being exported, the destination, or the end-user of the export pose some risk. A full assessment is based on six published criteria and involves the Export Controls team seeking information from a range of sources including open-source reporting, relevant MFAT regional divisions and posts, and sometimes international partners. For each full assessment a legal assessment is also undertaken. Of the 34 full assessments completed in 2024, 27 were approved, six were declined and one was withdrawn.

In 2024, we introduced less in-depth intermediate assessments. These assessments are typically used for lower risk applications for which a full assessment was undertaken in the past. The six published criteria are still utilised in the assessment process, although the extent of consultation and research are less in-depth than for a full assessment. Depending on what this turns up, an intermediate assessment process might be converted to a full assessment process. In 2024, 25 intermediate assessments were completed.

Permits can be withdrawn by applicants for a number of reasons, most commonly when the timing for the export falls outside the permit time period and the permit issued is not to be used. At the end of the 2024 calendar year 12 permits originally approved in 2023 were withdrawn. These 12 permits are not counted in the ‘Approve’ total in the table below.

Permits can be revoked by the Secretary of Foreign Affairs and Trade if conditions have changed, or new information has come to light since the permit was issued that mean the permit is no longer appropriate. No permits were revoked in 2024.

Amending permits (extending their expiry dates, adding or removing items, or modifying the end user) also counts towards approvals. For this reason, total numbers of approvals granted as it appears in this table may be higher than elsewhere in this report.

Table 1: Overview of application processing

Permit Decision	Category of export/import	Standard Assessments	Intermediate assessments	Full Assessments	Total
Approved	Goods Export	899	24	27	950
	Chemicals Export	5	-	-	5
	Chemicals Import	58	-	-	58
		962	24	27	1,013
Declined	Goods Export	1	1	6	8
	Chemicals Export	-	-	-	-
	Chemicals Import	-	-	-	-
		1	1	6	8
Withdrawn	Goods Export	42	-	1	43
	Chemicals Export	-	-	-	-
	Chemicals Import	3	-	-	3
		45	-	1	46
Revoked	Goods Export	1	-	-	1
	Chemicals Export	-	-	-	-
	Chemicals Import	-	-	-	-
		1	-	-	1
		1,009	25	34	1,068

Types of permits issued

There are five different types of export permits issued under the Export Controls regime:

Single Permit

Single export permits are issued for the permanent export of a fixed quantity of specified items in a single shipment. The permit is valid for a three-month window from the date it is issued.

Multiple Permit

Multiple export permits are issued for the export of a fixed quantity of controlled items that will be exported in several shipments over an extended period up to 18 months in duration.

Exporters may be required, as a condition of their permit, to provide information to MFAT on the amounts of goods exported under the multiple permit, according to a set six-monthly reporting timetable.

Single Temporary Permit

Temporary export permits are issued for a fixed quantity of specified items temporarily leaving New Zealand with the intention of return to the owner e.g. for a trade exhibition.

Generally, the export item will be in the care of the owner (sales representative, firearm owner etc), although items may be exported temporarily to a third party e.g. for the purposes of trial or repair by a third party.

The permit is valid for a three-month window from the date it is issued.

A condition of a temporary permit is that MFAT Export Controls is notified when the goods have been returned to New Zealand.

Single Transit Permit

Single transit permits are issued for goods that enter New Zealand, but are not offloaded, and continue onward to their destination.

General Consent

An exporter may apply for a general consent to export specific listed items to a destination or destinations. This gives approval to the exporter to export any volume of the specified products to any end-user in the approved countries over a period of up to 24 months.

Applications are usually approved for exporters with a business case that justifies the use of a general consent i.e. a sufficient volume of goods.

Normally, general consents are only granted for other export control member countries, although applications are considered for other countries. In these cases, each end user must be specified.

Most permits issued in 2024 were single permits for the export of strategic goods and catch-all exports.

Table 2: Permits issued by permit type

	Number of permits issued					
	Single	Single Temporary	Multiple	General Consent	Approval In Principle	Grand Total
Strategic Goods & Catch-all Exports	791	36	46	52	25	950
Chemicals Export	5	N/A	N/A	N/A	N/A	5
Chemicals Import	58	N/A	N/A	N/A	N/A	58
Grand Total	854	36	46	52	25	1,013

Timeliness

The Export Controls team aims to process applications requiring only standard assessments within ten working days. In 2024, standard assessments took on average 1.5 calendar days for strategic goods and catch-all exports, 3.8 calendar days for chemical exports and 1.1 calendar days for chemical imports. The delay in approval of chemical exports was largely due to the required documentation not being submitted at the time of application.

The full and intermediate assessment processes necessarily take longer, as these are, to varying degrees, more in-depth (see the 'Overview of application processing' section in this report for information on what occurs). Full assessments for approved single export permits took the longest to approve, at an average of 24 calendar days to process.

For the assessments data overleaf, the 'average days to process' figures exclude delays if further information needed to be sought from the exporter. The time taken for post-permit amendments are also excluded: 82 permits had amendments made post-permit issuance and were excluded from the timeliness calculations below. Permits can be amended more than once if there are shipping delays.

Table 3: Time taken to process standard assessments

Permit applied for	Number of permits (all approved)	Average days to process*
Strategic Goods & Catch-all Exports		
Single	736	1.5
Single Temporary	36	1.1
Multiple	13	2.2
General Consent	20	2.3
All strategic goods & catch-all exports	805	1.5
Chemical exports		
Single	5	3.8
All chemical exports	5	3.8
Chemical imports		
Single	56	1.1
All chemical imports	56	1.1

*Average days to process' is calculated in elapsed calendar time, including public holidays and weekends as well as working days.

Application approvals by region

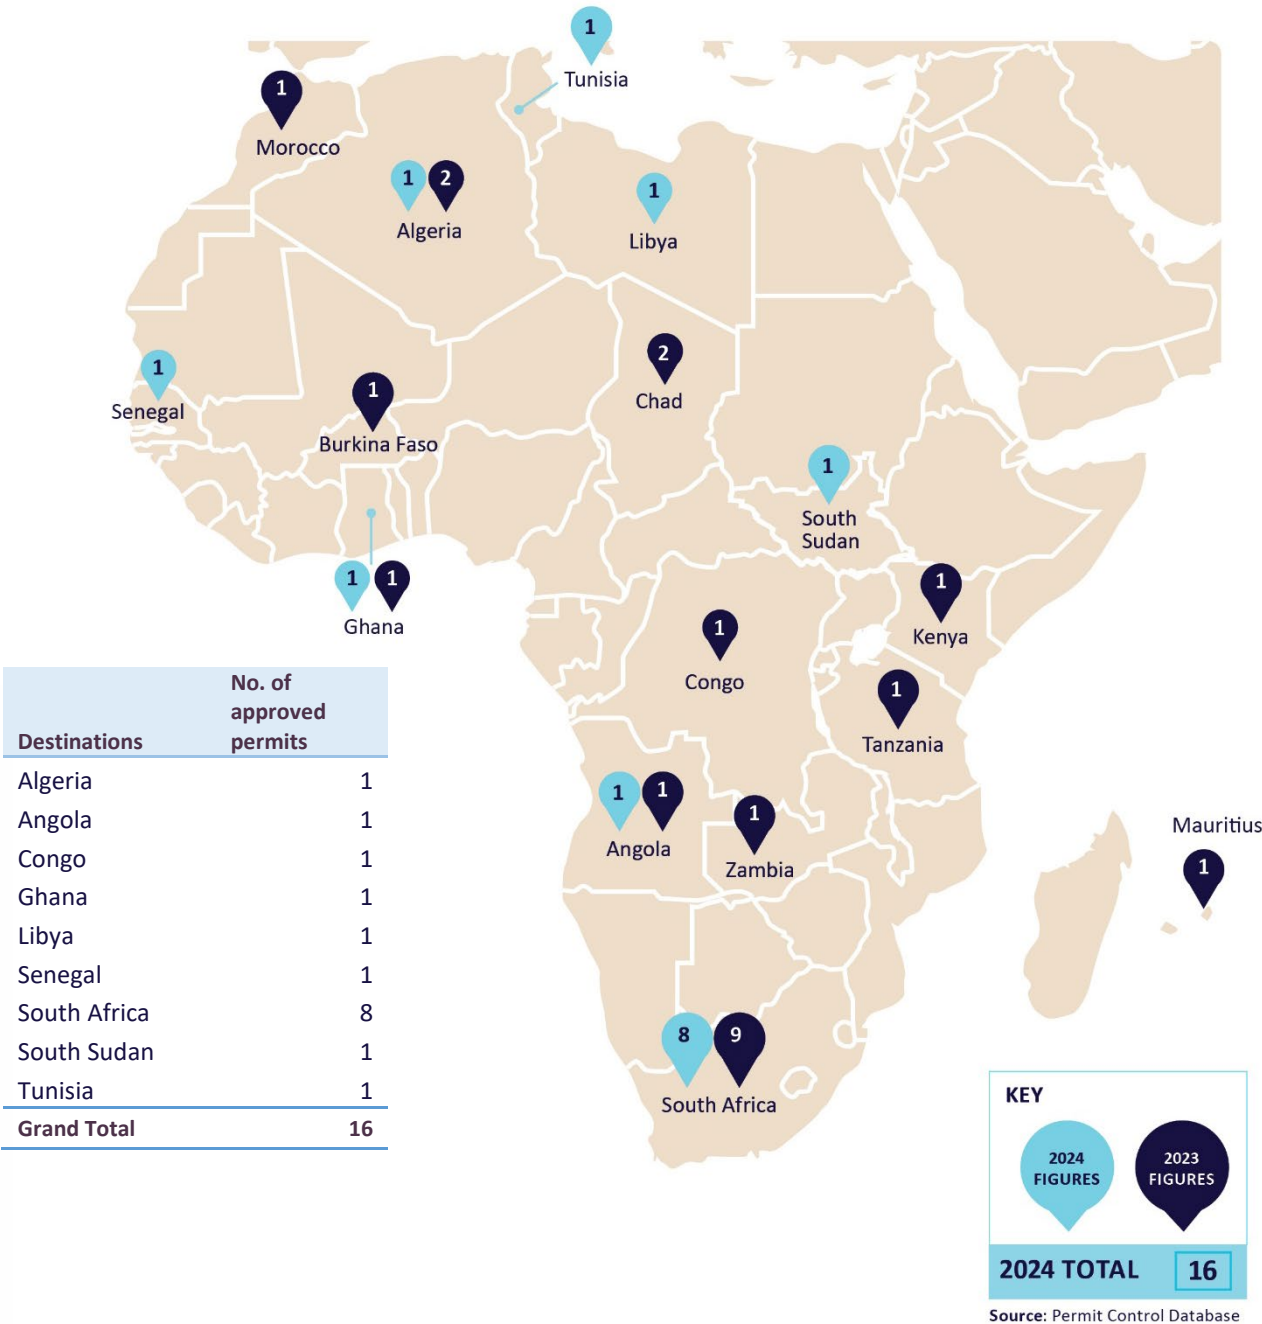

When reading this section and comparing it to totals elsewhere in this report please note that some permits (general consents) can cover multiple destinations, and hence these permits are counted for more than one destination in this section.

*Regional mapping of destinations is based on data sources such as United Nations geoschemes and “Our World in Data”.

Africa

For the Africa region in 2024, there were **16 applications for permits approved** for the export of strategic goods and catch-all exports. This is a decrease of five permits compared to the 2023 reporting year, when 21 applications were approved. No approval decisions were made for controlled chemical exports to Africa or imports into New Zealand in 2024.

Figure 1: Application approvals for the export of strategic goods and catch-all exports to Africa in 2024

Americas

For the Americas region in 2024, there were **154 applications for permits approved** for the export of strategic goods and catch-all exports. This is an increase of ten permits compared to the 2023 reporting year, when 144 applications were approved. There were no approval decisions made for controlled chemical exports to the Americas or imports into New Zealand in 2024.

Figure 2: Application approvals for the export of strategic goods and catch-all exports to the Americas in 2024

Asia

For the Asia region in 2024, there were **176 applications for permits approved** for the export of strategic goods and catch-all exports. This is an increase of 40 permits compared to the 2023 reporting year, when 136 applications were approved.

There were no approval decisions made for controlled chemical exports to Asia in 2024, compared to two in 2023.

Figure 3: Application approvals for the export of strategic goods and catch-all exports to Asia in 2024

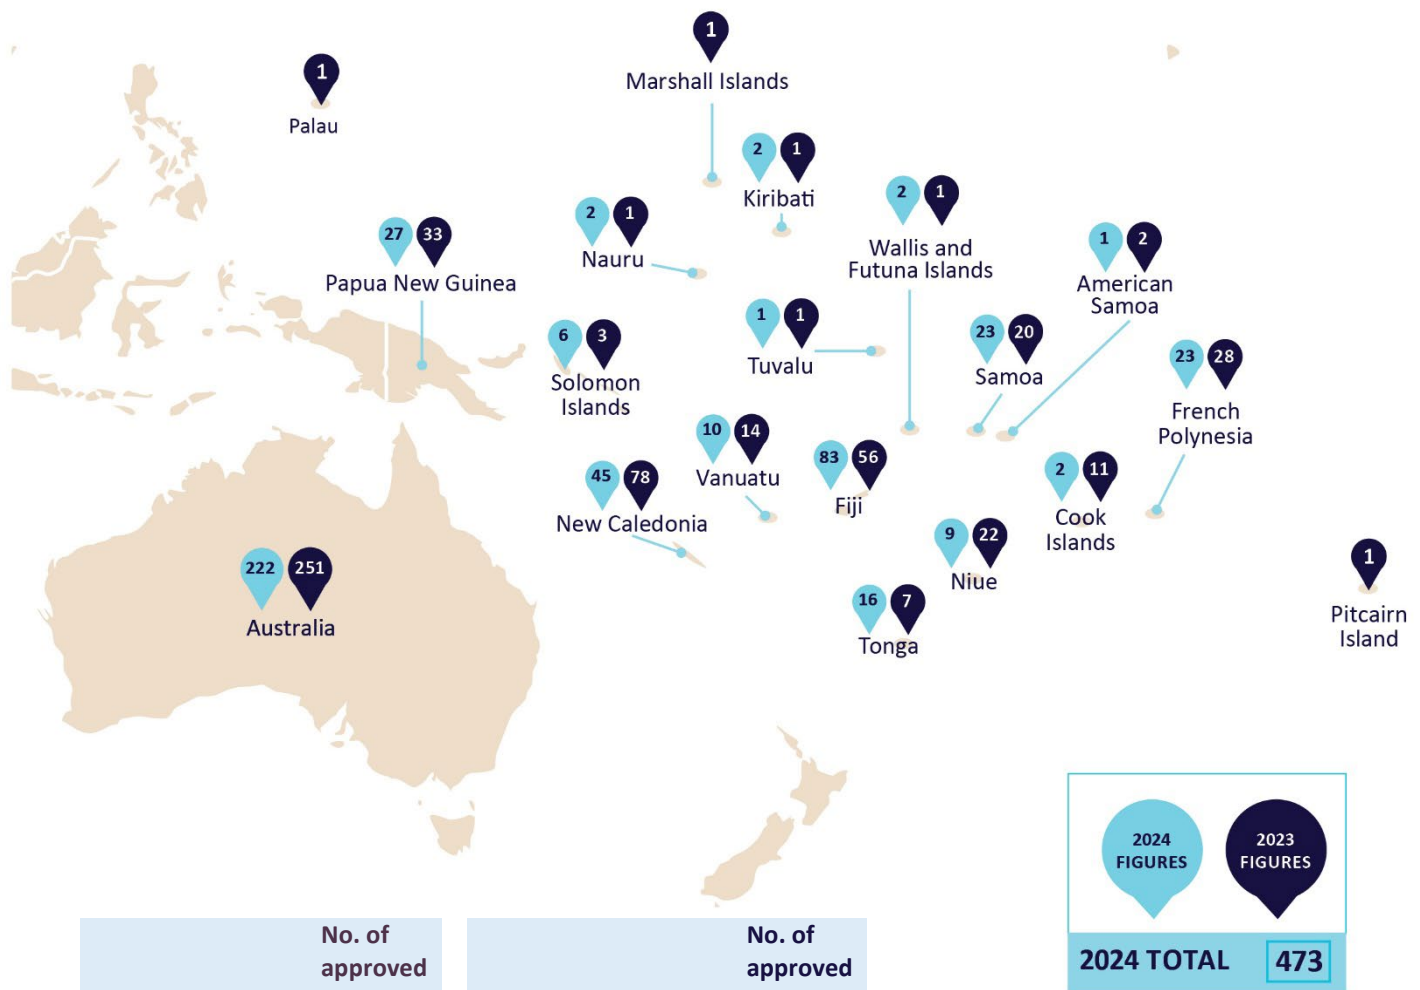

Australia and Pacific

For the Australia and Pacific region in 2024, there were **473 applications for permits approved** for the export of strategic goods and catch-all exports. This is a decrease of 40 permits compared to the 2023 reporting year, when 513 applications were approved.

There were **four applications** for the export of controlled chemicals approved to this region in 2024, compared to one in 2023.

There were **58 applications** for the import of controlled chemicals into New Zealand approved in 2024 compared to 68 in 2022.

Figure 4: Application approvals for the export of strategic goods and catch-all exports to the Australia and Pacific region in 2024

Source: Permit Control Database

Europe

For Europe in 2024, there were **144 applications for permits approved** for the export of strategic goods and catch-all exports. This is an increase of eight permits compared to the 2023 reporting year, when 132 applications were approved. There was one approved application for controlled chemical exports to Europe in 2024, identical to the 2023 reporting period.

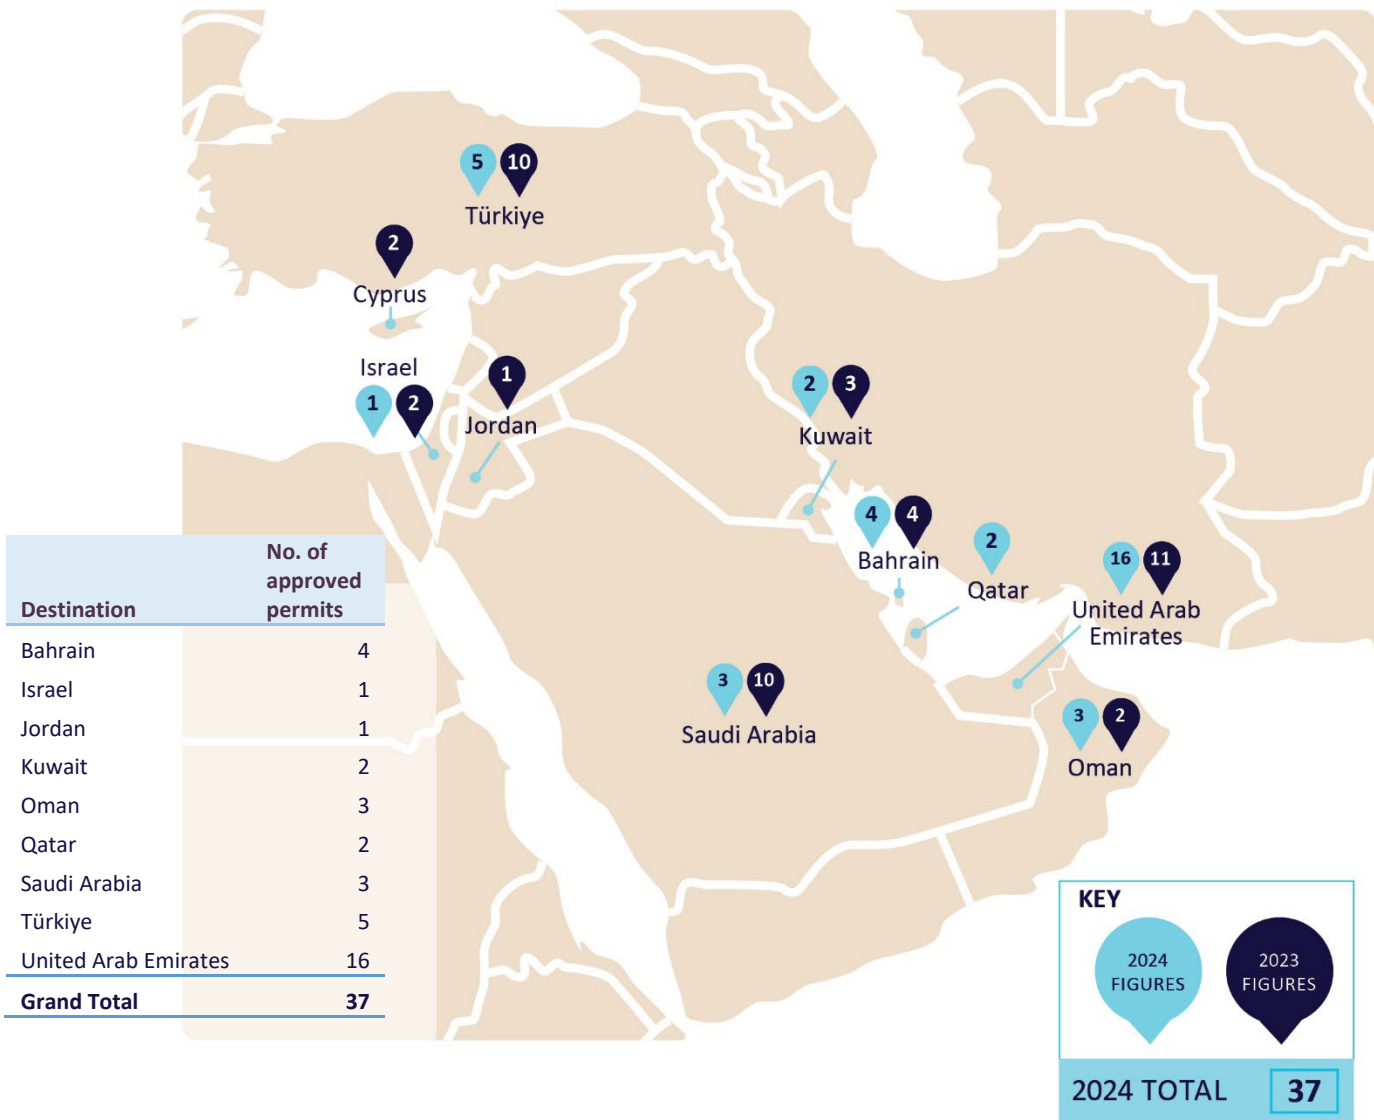

Figure 5: Application approvals for the export of strategic goods and catch-all exports to Europe in 2024

Middle East

For the Middle East in 2024, there were **37 applications for permits approved** for the export of strategic goods and catch-all exports. This is a decrease of six permits compared to the 2023 reporting year, when 43 applications were approved. There were no approval decisions made for controlled chemical exports to the Middle East or imports into New Zealand in 2024.

Figure 6: Application approvals for the export of strategic goods and catch-all exports to the Middle East in 2024

Source: Permit Control Database

Other

There were **two other applications for permits** for the export of strategic goods and catch-all exports, one into international waters and one to Wassenaar countries.

Submissions to Ministers

MFAT made the following submissions to Ministers and Cabinet in relation to Export Controls across the 2024 calendar year. These submissions cover the full scope of the Export Controls team's work, including processing diplomatic clearances for state / military aircraft and vessels. The title of one submission has been redacted.

Table 5: Submissions to Ministers and Cabinet

Date Submitted	Submitted to	Title of Submission
30/01/2024	Minister of Foreign Affairs	New National Export Controls Legislation
15/02/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act: Approval for Visit by British Naval Vessel – HMS TAMAR
04/03/2024	Minister of Foreign Affairs	Export controls: additional unilateral controls
06/03/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act: Approval for Visit by United States F-16C Combat Aircraft
17/04/2024	Minister of Foreign Affairs / Prime Minister	Title redacted under s6(a) of the Official Information Act – prejudice the international relations of the Government of New Zealand.
17/05/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act: Approval for Visit by Mexican Naval Vessel –CUAUHTÉMOC
31/05/2024	Minister of Foreign Affairs	Title redacted under s6(a) of the Official Information Act – prejudice the international relations of the Government of New Zealand.
04/07/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act - Approval for visit by German Air Force
09/07/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act: Approval for visit by Spanish Air Force A400M
17/07/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act: Approval for Visit by British Navy Vessel – HMS TAMAR
15/07/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act: Approval for visit by Indian Naval Sailing Vessel TARINI

30/10/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act: Approval for Visit by French Navy Vessel - VENDEMIAIRE
04/11/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act: Approval for visit by Republic of Korea Navy Ship HANSANDO
20/11/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act: Foreign Military Aircraft Annual Clearance for 2025
03/12/2024	Minister of Foreign Affairs / Prime Minister	Nuclear Free Zone Act: Request for visit by United States Coast Guard Cutter MIDGETT

Other activities undertaken by Export Controls team

Outreach

Members of the Export Controls team made 25 outreach visits to exporters and convened five virtual outreach meetings in 2024.

Informal Advice

The Export Controls team provides informal advice to exporters (including businesses and individuals). Currently statistics are not collected on the work performed providing informal advice.

Exemptions for private individuals to export certain firearms

MFAT was notified of 253 exports by private individuals of exempted firearms in 2024. Exports of firearms are required to be notified to MFAT to enable New Zealand's Arms Trade Treaty reporting obligations. Source: Exempted Firearm Export Figures Spreadsheet.
