# Annex 8.1.2: Schedule of Commitments of Singapore

# **Cover Note**

# **Central Product Classification ("CPC")**

1. With the exception of telecommunications services, archive services, other maritime auxiliary services and financial services, the classification of services sectors shall be based on the 1991 provisional Central Product Classification of the United Nations Statistical Office. The ordering shall reflect the services sectoral classification list as used in GATT document MTN.GNS/W/120 dated 10 July 1991. The use of "\*\* " against individual CPC codes indicates that the specific commitment for that code shall not extend to the total range of services covered under that code.

2. The definitions for telecommunications services, archive services, other maritime auxiliary services and financial services shall be as stated in the schedule of specific commitments for these services.

### Format for Scheduling

The scheduling of specific commitments shall follow the guidelines stated in GATT documents MTN.GNS/W/164 dated 3 September 1993 and MTN.GNS/W/164/Add.1 dated 30 November 1993.

### Scheduling of Measures Relating to both Market Access and National Treatment

Measures inconsistent with both Articles 17 and 18 have been inscribed in the column relating to Article 17. The inscription shall also be considered a qualification to Article 18.

### Supply of Services which are not Technically/Technologically Feasible

Except for telecommunications services, the entry "Unbound\*" means unbound due to lack of technical/technological feasibility.

<sup>&</sup>lt;sup>1</sup> In view of spectrum constraints, parties interested in deploying networks based on wireless technology will be licensed via a tender and/or auction process.

 <sup>&</sup>lt;sup>2</sup> Facilities-based operators are operators that intend to deploy any form of telecommunication networks, systems and facilities to offer telecommunication switching, transmission capacity and services to existing licensed telecommunication operators, businesses and consumers.
 <sup>3</sup> The Info-Communications Development Authority of Singapore (iDA) will consider favourably

<sup>&</sup>lt;sup>3</sup> The Info-Communications Development Authority of Singapore (iDA) will consider favourably applications by FBOs to be designated as PTLs if the FBO commits to substantial infrastructure investment and rollout to offer services to a significant proportion of the population within a reasonable time period. In return, a PTL's network installation process and the maintenance and protection of their networks receive special consideration under the Telecommunications Act of 1999.

<sup>&</sup>lt;sup>4</sup> These networks can have international, nationwide local or selected local coverage.

<sup>&</sup>lt;sup>5</sup> Services-based operators are operators who lease telecommunications network elements (i.e. transmission capacity, switching services, ducts, fibre, etc.) from FBO licensees to provide telecommunication services to third parties or who resell the telecommunications services of FBOs.

<sup>&</sup>lt;sup>6</sup> Under the class licensing scheme, the licence terms and conditions are gazetted. Anyone who provides the services will be deemed to have read and agreed to the terms and conditions of the class licence. They will also be required to register with iDA.
