EXPLANATORY NOTES

- 1) States Parties that do not have any exports and/or imports to report should file a "nil report" clearly stating that no exports/imports have taken place in any of the categories during the reporting period. Templates for such nil reports are included in Annex 3.
- 2) Date for collected statistics (for instance 30 June or 31 December).
- 3) Based on UN Registry practice. An international arms transfer could mean, in addition to the physical movement of equipment to or from national territory, the transfer of title to- and control over the equipment. Other criteria are also possible. States Parties should here provide a description of the national criteria used to determine, for control purposes, exactly when an arms transfer takes place.
- 4) As outlined in Articles 2 (1) (a)-(h) and 5(3). **For more precise definitions of the categories, see Annex 1.**
- 5) Article 13(3) allows reporting of either authorised or actual exports / imports. The choice can be made at the national level for a report as a whole or category by category. Please indicate by ticking the appropriate box for each category reported whether the value represents authorisations (Auth.) or actual exports (Act.). **It is highly desirable that national choices in this respect, once made, should remain stable over time for reasons of consistency and continuity.** A State Party wishing to report both quantity and value may of course do so, but then needs to submit two tables, one for authorised exports / imports and the other for actual exports / imports.
- 6) The size of exports / imports may be indicated either as quantity or as value. The choice can be made at the national level for each category of arms, but, **once made, should remain stable over time for reasons of consistency and continuity.** A State Party wishing to report both quantity and value may of course do so.
- 7) Standard UN Registry reporting variable. Please indicate unit, if not 'pieces'
- 8) Optional alternative. Please indicate unit (for example national currency)
- 9) In line with UN Registry practice
- 10) In line with UN Registry practice. NB: This is a shaded column, voluntary in terms of the obligations of the ATT
- 11) In line with UN Registry practice. In the first "Remarks" column, States Parties may, if they so wish, describe the item transferred by entering the designation, type, model or any other information considered relevant. The second column may be used to explain or clarify the nature of the transfer - for instance if it is temporary (e.g. for exhibitions or repairs), or if it is industrial in nature (perhaps intended for integration into a larger system). NB: These are shaded columns, voluntary in terms of the obligations of the ATT

- 12) As outlined in Article 2 (1) (a)-(g), See Annex 1 for the UN Registry's more precise definitions of the categories I-VII, including subcategories.
- 13) See Article 5(3)
- 14) As outlined in Article 2 (1) (h), with sub-categories taken from the UN Registry template for voluntary reporting of Small Arms and Light Weapons. This choice has been made provisionally, pending later agreement between States Parties on the desirability of using this or another UN definition of SALW sub-categories (for instance from the UN Firearms Protocol or the International Tracing Instrument - ITI). NB: The SALW sub-categories in this report are shaded, representing voluntary information in terms of the obligations of the ATT
- 15) "national definitions shall not cover less than the descriptions used in relevant United Nations instruments at the time of entry into force of this Treaty" (Article 5(3))
- 16) In line with UN Registry practice, States Parties may choose between reporting small arms by sub-type or as an aggregate.
- 17) In line with UN Registry practice, States Parties may choose between reporting light weapons by sub-type or as an aggregate.
- 18) Article 5(3) encourages States Parties to apply the provisions of the Treaty to the broadest range of conventional weapons. Any such additional categories are voluntary and categories used may vary between States Parties. If provided at all, extra categories should be more precisely defined in Annex 2.

- b) Man-Portable Air-Defence Systems (MANPADS)³.

² Multiple-launch rocket systems are covered by the definition of category III.

³ MANPADS should be reported if the MANPAD system is supplied as a complete unit, i.e. the missile and launcher/Grip Stock form an integral unit. In addition, individual launching mechanisms or grip-stocks should also be reported. Individual missiles, not supplied with a launching mechanism or grip stock need not be reported.

VI.	UN Registry definition
VII.	UN Registry definition
VIII.	<p>UN Registry definition with additional details:</p> <ol style="list-style-type: none"> All of the small arms and light weapons listed in the export section fall under category ML1, ML 2 or ML901 on New Zealand's Strategic Goods List, which is available online at: https://www.mfat.govt.nz/assets/Strategic-goods-forms/New-Zealand-Strategic-Goods-List-October-2017.pdf Please refer to pages 34 and 60 respectively. Export permits do not differentiate between subsets of these categories. Under New Zealand law the term <i>Military-Style Semi-Automatic</i> (MSSA) describes a self-loading rifle or shotgun with one or more of the following features: <ul style="list-style-type: none"> Folding or telescopic butt; Magazine that holds, or is detachable and has the appearance of holding, more than 15 cartridges for .22 rimfire; Magazine that holds more than 7 cartridges, or is detachable and has the appearance of holding more than 10 cartridges for other than .22 rimfire; Bayonet lug; Pistol grip as defined by Order in Council; Flash suppressor. <p>MSSA was introduced as a firearm descriptor in 1990. The term includes weapons that, outside New Zealand, could be classed as (or upgraded to) Assault Rifles. New Zealand is therefore reporting all MSSAs under the Assault Rifle category, although most would usually be described as rifles with the potential to be upgraded to Assault Rifles.</p> Medium and General Purpose Machine Guns: The New Zealand Defence Force considers a 7.62mm MMG or GPMG as fitting within the parameters of the Light Machine Gun section. Any machine gun over 0.5" caliber would be a Heavy Machine Gun and likely mounted. Small arms figures include exports made with a temporary export permit. 	<p>Shotguns: New Zealand has a strong hunting and target shooting tradition, making shotguns a significant percentage of New Zealand's total small arms imports and exports. Reporting of these items serves to advance the object and purpose of the Arms Trade Treaty.</p>
